Summary

Software Developer | Full Stack building scalable, responsive, and engaging web applications. Pursuing a **B.E. in Computer Engineering** at Indira College of Engineering & Management (GPA: 8.86) and currently a **Full-Stack Development Intern** at Gryphon Academy, working across front-end and back-end technologies to deliver end-to-end solutions.

Experience

Gryphon Academy Pvt Ltd — **Sept 2025 - Present**
Intern- Software Developer — Baner, Pune
https://www.gryphonacademy.co.in

- **Developed a Leaving Certificate Generation backend system** with role-based access (Admin, Student, Superadmin) and periodic request automation.
- **Built a Test Hub platform** enabling test creation, management, and publication across multiple colleges.

codeXslinger — **January 2025 - July 2025**
MERN Stack Developer — Pune, Maharashtra
https://codexslinger.com

- Developed and launched **five core projects** and multiple smaller applications throughout the internship.
- Developed and integrated RESTful APIs, optimizing data flow across services.
- Built full-stack applications using MongoDB, Express.js, React.js, and Next.js.
- Ensured responsive UIs and applied best practices in security and deployment.

Education

Indira College of Engineering & Management — **Nov 2022 - Present**
B. E — Computer Engineering
8.86 CGPA

Projects

DebugDen
https://debug-den.vercel.app

A full-stack Q&A platform designed to foster a collaborative community for technical problem-solving. Developed a responsive and dynamic application using **Next.js** and **React** on the frontend and **Appwrite**. Implemented core functionalities including robust user authentication, a RESTful API for **CRUD operations and server side logic management**, and real-time interaction features such as a reputation-based voting system, comments, and answers. The project demonstrates proficiency in modern web development practices and efficient state management with **Zustand**.

Vidtube — **March 2025 - April 2025**
Youtube Clone

Designed and implemented the backend services for a YouTube-inspired video streaming application, including APIs for video search, playback, subscriptions, and channel management.

Next Auth
Auth Template in Next.js

Next Auth is a production-ready **Next.js authentication template** that uses **JWT with access and refresh tokens**. It provides a **plug-and-play solution** for secure, scalable user authentication in modern Next.js apps.
